PowerHouse/FastTrack

The Modular *PowerHouse/WMS* Methodology

RIGHT SIZED

You choose the functionality that will immediately add value to your business and always have the ability to incorporate additional modules to meet new opportunities

FASTEST RETURN ON INVESTMENT

FastTrack lets you implement the functionality you need to quickly improve your business resulting in the shortest Time-to-Value

YOU'RE IN CONTROL

QSSI's RESULTS based implementation methodology emphasizes knowledge transfer to enable you to leverage *PowerHouse/WMS* quickly by putting YOU in control

Fastest Time to Value

- *FastTrack* leverages renowned *PowerHouse/WMS* functionality to meet virtually any supply chain execution challenge

- *PowerHouse's* modular design lets you choose the functionality that will provide immediate improvement to your business

- *FastTrack* scales to your changing operational needs through configuration, not customization

- As your business expands *PowerHouse FastTrack* grows with you

Companies of all sizes can benefit from the efficiencies of scale achievable using the *FastTrack* approach to implementing *PowerHouse/WMS*. *PowerHouse/WMS* is the premier enterprise class WMS that features a modular design that enables *FastTrack* implementations. Leveraging tier-one WMS functionality, *FastTrack* is the ideal solution for companies that need a solution that can grow with their businesses.

FastTrack allows you to reap the benefits that come from implementing proven *PowerHouse/WMS* solutions at a pace that matches your objectives.

Starting with a highly functional, RF enabled *PowerHouse* system, you can choose from a library of feature rich modules to configure a solution that will meet your exact requirements.

With *FastTrack* you implement just the WMS functionality you need which provides numerous benefits. *FastTrack* reduces ownership costs because you are able to purchase the functionality you require for you business without investing in technology you won't use.

Implementation services are scaled to your project, so when you want to on-board your new PowerHouse system you will be in control of the implementation and costs resulting in on-time on budget results. And *FastTrack* gives you the flexibility to react to change rapidly and with confidence that your system will be able to deliver on your promises.

Comprehensive Warehouse Control
That Fits Your Needs

There is no compromise when it comes to *FastTrack*
implementations. *FastTrack* uses the proven PowerHouse/WMS
enterprise system to configure the functionality that will work best for
you.

The base *PowerHouse/WMS* system *FastTrack* starts with provides
the key warehouse management functions to get your business on
track. Inventory control, receiving, stock location, order fulfillment,
lot control and much more form the basis for future expansion.

And as your business grows and requirements evolve *FastTrack* lets
you easily deploy additional PowerHouse/WMS modules like; 3PL
Billing, Production, Task Management, Productivity, Kitting and
others to enable immediate solutions to you business needs.

With *PowerHouse-FastTrack* you get all of the advantages of the *PowerHouse/WMS* Enterprise solution at an
exceptional value point with the ability to scale up to meet any warehousing challenge.
