

## Great Plains—PowerHouse/WMS

*PowerHouse/WMS – The comprehensive Distribution and Warehousing solution for any business using Microsoft Dynamics GP*

### QSSI

For 20 years QSSI has been a leader in the Supply Chain and Warehouse Management Software industry. Our success has been tied to PowerHouse/WMS's ability to easily and effectively integrate to Microsoft Dynamics GP (formerly Great Plains). Implemented in 2000 at Brown Trout Publishers Inc., PowerHouse/WMS was the first certified Great Plains Warehouse Management System. Building on that groundbreaking event, QSSI has continued its successful integrations of PowerHouse/WMS to Microsoft Dynamics Great Plains Software. QSSI's clients have each sought to leverage their investment in Great Plains while adding a cost effective and industry leading Warehouse Management System. State-of-the-art Lean Warehousing functionality, proven integration history with Great Plains, and outstanding customer referrals assure any Great Plains owner that they are making the right selection in PowerHouse/WMS.

### Advanced integration

Leveraging the power of Great Plains and PowerHouse/WMS through an advanced integration architecture provides real time data where it's needed. This two way data exchange permits PowerHouse/WMS to retrieve data (records and documents) from Great Plains to drive receiving, inventory management, production, manufacturing, kitting and returns. As each operation is complete PowerHouse/WMS updates Great Plains with the complete accounting implications for: incrementing and decrementing inventory, ASN inbound and outbound information, production run completion, back flush and Bill of Materials / Kitting completion. The net benefit is complete control over inventory levels and up to the minute transaction records converted to invoices, thereby accelerating the collection process and keeping replenishment levels to a serviceable and cost effective minimum.

### Get the most from your Great Plains purchase

Why settle for less than the most experienced and productive Tier 1 WMS package, one that integrates seamlessly with your Great Plains Software and offers full functionality, unlimited flexibility, scalability, and the fastest possible ROI.

QSSI'S CLIENTS HAVE EACH SOUGHT TO LEVERAGE THEIR INVESTMENT IN GREAT PLAINS WHILE ADDING A COST EFFECTIVE AND INDUSTRY LEADING WAREHOUSE MANAGEMENT SYSTEM.

## Company

QSSI is an innovative and dynamic company providing state-of-the-art Warehouse Management Software. ---

*"When we began our search for a new WMS system we were looking for a package that was easy to use and where configuration changes could be made without costly programmer assistance. QSSI's Powerhouse/WMS met these requirements and much more."*

— CHUCK INMAN, MUSEUM OF MODERN ART

*"Kuehne Nagel is one of the worlds largest Third Party Logistics companies and as such we require state of the art performance from our WMS solution. After trying 2 other solutions the market had to offer and finding they didn't meet our expectations we implemented QSSI's PowerHouse/WMS and are extremely pleased with their ability to meet the varied demands of our client base." (QSSI is now installed in 51 K&N facilities)*

— ERNIE DOUGLAS, KUEHNE NAGEL

*"From an integrators perspective, product development and responsiveness are critical. QSSI has always engaged enthusiastically with us in knowledge exchange, product development & customer support."*

— DOUG STRACEY, TALLSHIPS SOLUTIONS
